

Table of Contents

Volume 1: Lectures

Co-operation	ii
Conference Organization	iii
Preface	iv
<i>Hahne, E.W.P. and Benner, Martin</i>	
Table of contents	v
Foreword	xv
<i>Flath</i>	
Opening Lecture	xvii
<i>von Weizsäcker, Ernst Ulrich</i>	
International Activities	
International Energy Agency - Energy Conservation Through Energy Storage - Implementing Agreement	1
<i>Paksoy*, Halime and Evliya, Hunay</i>	
Implementing Underground Thermal Energy Storage - Main Results and Findings of IEA ECES Annex 8	7
<i>Nordell, Bo</i>	
Annex 10 – Phase Change Materials (PCM) and Chemical Reactions for Thermal Energy Storage (TES)	13
<i>Setterwall, Fredrik</i>	
IEA ECES Annex 12 - High Temperature Underground Thermal Energy Storage	17
<i>Sanner*, Burkhard and Knoblich, Klaus</i>	
Guidelines and areas for further research and development for UTES applications	25
<i>Andersson, Olof</i>	
Cooling in All Climates with Thermal Energy Storage Annex 14 of the International Energy Agency Energy Conservation through Energy Storage - Implementing Agreement	29
<i>Turgut*, Bekir; Paksoy, Halime and Cruickshanks, Frank</i>	
National Overviews	
Towards the Growth of ATEs in Flanders (Belgium)	33
<i>Dirven*, Paul and Gysen, Bert</i>	
Thermal storage for solar heating systems in Austria - Lessons learned and market prospects	39
<i>Faninger, Gerhard</i>	

* *corresponding author*

Development of Seasonal Storage in Denmark - Status of Storage Programme 1997-2000 <i>Heller, Alfred</i>	47
Status of Seasonal Thermal Energy Storage in Germany <i>Lottner*, Volkmar and Mangold, Dirk</i>	53
Thermal Energy Storage in Japan <i>Ochifuji*, Kiyoshi; Hamada, Yasuhiro and Nakamura, Makoto</i>	61
Chinese ATES Technology and Its Future Development <i>Wu*, Xiaobo; Ma, Jie and Bink, Bastiaan</i>	69
Recent UTES Development in Sweden <i>Andersson*, Olof; Hellström, Göran and Nordell, Bo</i>	75
Environmental Assessment Guide For UTES Applications - Results from IEA Annex 8 <i>Cruickshanks, Frank</i>	81

Underground Thermal Energie Storage (UTES) - Design

Guideline draft (green paper) VDI 4640, part 3: Underground Thermal Energy Storage <i>Sanner*, Burkhard and Konstantinidou, Eleni</i>	87
Operating Strategies for ATES in Areas with Non-ideal Climates <i>Allen*, D.M.; Woo, C.; Shymko, G.F. and Maynard, S.</i>	93
Parametric study of a single-well seasonal ATES <i>Dupasquier*, Stéphane and Parriaux, Aurèle</i>	99
Optimization of well field configurations for Aquifer Thermal Energy Storage <i>van Elswijk*, R.C.; Drijver, B.; Jellema, I. and Willemsen, A.</i>	105
An experimental study on influences of natural convection on Darcy's flow with a vertical temperature difference for the aquifer thermal energy storage <i>Nagano*, Katsunori; Mochida, Tohru and Shimakura, Kazumi</i>	111
Collection of Geodata for UTES-applications by the use of Test Drilling <i>Andersson*, Benjamin and Andersson, Olof</i>	117

Aquifer Thermal Energie Storage (ATES) - Projects

Aquifer Storage of Natural Cold for the Stockholm District Cooling System <i>Andersson*, Olof and Rudling, Hans</i>	123
Aquifer Thermal Energy Stores in Germany <i>Kabus*, Frank; Seibt, Peter and Poppei, Joachim</i>	129
ATES Well Field Study and the Choice of Aquifer in a Sedimentary Environment: A Case Study <i>Michel*, F.A. and Allen, D.M.</i>	135

Launcher-typed ATEs in Laboratory Development	141
<i>Yokoyama*, Takao; Higuchi, Tomonori; Shikama, Norio; Abiko, Hiroto and Hirose, Koichi</i>	

Lessons from 100 ATEs projects - The developments of aquifer storage in the Netherlands	147
<i>Snijders, Aart L.</i>	

Ground Thermal Properties / Ground Heat Exchanger

Test Field for Heat Storage in Clay at High Temperatures - Results and Practical Experiences from Seven Years of Operation	153
<i>Gabrielsson*, Anna; Bergdahl, Ulf and Moritz, Lovisa</i>	

Recent Status of In-situ Thermal Response Tests for BTES Applications in Sweden	159
<i>Gehlin*, Signhild and Hellström, Göran</i>	

In Situ Measurement of Ground Thermal Properties	165
<i>Spitler*, J.D.; Yavuzturk, C. and Rees, S.J.</i>	

In-Situ Measurement of Thermal Properties of Cunard Formation in a Borehole, Halifax, Nova Scotia	171
<i>Cruikshanks*, Frank; Bardsley, James and Williams, Howard R.</i>	

Thermal Response Test - Experiences in Germany	177
<i>Sanner*, Burkhard; Reuss, Manfred; Mands, Erich and Müller, Jens</i>	

Laboratory Measurements of Heat Transfer Properties for Different Types of Borehole Heat Exchangers	183
<i>Hellström*, Göran and Kjellsson, Elisabeth</i>	

Fibre optic temperature measurements: a new approach to determine the dynamic behaviour of the heat exchanging medium inside a borehole heat exchanger	189
<i>Hurtig*, Eckart; Ache, Robert; Großwig, Stephan and Hänel, Klaus</i>	

Borehole Thermal Energy Storage (BTES) – Projects and Design

Analytical Studies of the Influence of Regional Groundwater Flow on the Performance of Borehole Heat Exchangers	195
<i>Claesson*, Johan and Hellström, Göran</i>	

Borehole Heat Storage for the Anneberg Solar Heated Residential District in Danderyd, Sweden	201
<i>Dalenbäck, Jan-Olof; Hellström, Göran; Lundin*, Sven-Erik; Nordell, Bo; Dahm, Jochen</i>	

Evaluation of the Borehole Heat Store at InfraCity, Sweden	207
<i>Dalenbäck, Jan-Olof; Hellström*, Göran; Schroeder, Kjell</i>	

Underground seasonal heat storage for a solar heating system in Neckarsulm / Germany	213
<i>Seiwald*, H. and Hahne, E.</i>	

Solar District Heating with Seasonal Storage in Attenkirchen	221
<i>Reuss*, Manfred and Mueller, Jens-Peter</i>	

Energy piles as cost effective ground heat exchan	227
<i>Koene*, F.G.H.; van Helden, W.G.J.; Römer, J.C.</i>	

Seasonal Storage – Projects

Ground Source Heat Pump Systems for the Conservation of Electrical Heat - Design and Expected Performance of Possible Demonstration Plants	233
<i>Nilsson*, Gunnel; Gabrielsson, Anna; Hellström, Göran; Rosén, Bengt and Sundberg, Jan</i>	
Snow Deposit in Rock Cavern for Seasonal Cold Storage	239
<i>Nordell*, Bo and Johansson, Per</i>	
Seasonal Snow Storage for Cooling of Hospital in Sundsvall	245
<i>Skogsberg*, Kjell and Nordell, Bo</i>	
Seasonal Thermal Interaction between Ground and A Shallow Buried Water Tank	251
<i>Fukuhara*, Teruyuki; Goodrich, Laurel; Watanabe, Hiroshi and Tsuda, Shinji</i>	
The design and construction of the concrete hot water tank in Friedrichshafen for the seasonal storage of solar energy	257
<i>Lichtenfels*, Achim and Reineck, Karl-Heinz</i>	
High performance concrete hot-water tanks for the seasonal storage of solar energy	263
<i>Reineck*, Karl-Heinz and Lichtenfels, Achim</i>	
Pit Water Storage Ottrupgaard - A follow-up	267
<i>Heller, Alfred</i>	
Central solar heating plant with gravel water storage in Chemnitz (Germany)	275
<i>Urbaneck, Thorsten and Schirmer, Ulrich</i>	
The third generation of long-term gravel-water storage - Steinfurt-Borghorst	279
<i>Pfeil*, Markus; Koch, Holger and Benner, Martin</i>	

Diurnal Storage

European test standard for the performance characterisation of stores for solar heating systems	285
<i>Drück*, H. and Hahne E.</i>	
Hot Water Heat Storage in Medium-Size Industrial Systems - Theory and Practice	291
<i>Dalsgård*, Henrik; Qvale, Bjørn; Petersen, Peter Maagøe; Munkøe, Lars</i>	
Simultaneous Storage of Heating and Cooling From a Heat Pump	297
<i>Bruno, Frank</i>	
Study on Mixing Model of Temperature-stratified Chilled-water Thermal Storage Tank under Unsteady Input Condition	303
<i>Kitano*, Hiroaki; Sagara, Kazunobu</i>	
Optimised inlet design for horizontal solar energy storage tanks	309
<i>Van Berkel, J.</i>	
Combitanks with internal thermosyphonically driven heat exchangers for hot water - comparison of existing systems	315
<i>Leibfried, Ulrich</i>	

Phase Change Material (PCM)

Solidification Study of Non-Eutectic Molten Salt Systems with Acetamide and Sodium Acetate <i>Pavel, Mircea; Anghel, Elena Maria; Constantinescu*, Mariella; Serban, Sever</i>	321
Three Paraffin Porous Concrete Composite Systems for Thermal Energy Storage <i>Hadjieva*, M.; Filipova, Tz.; Stojkov, R.; Kirilov, R.</i>	327
Heat Transfer Enhancement at Phase Change Processes <i>Stritih*, U.; Novak, P.</i>	333
Phase Change Thermal Storage System for Moderate Temperature Applications <i>Ismail, Kamal A. R.; Abugderah*, Mabruk M.</i>	339
Development of new PCM for TES of the cooling system <i>Nagano*, Katsunori; Mochida, Tohru; Iwata, Kohe; Hiroyoshi, Horikawa; Domanski, Roman; Rebow, Marek</i>	345

Phase Change Material (PCM) – Modelling and Projects

Study of natural convection in Manganese (II) Nitrate Hexahydrate inside a differentially heated cavity <i>Domanski*, Roman; Nagano, Katsunori; Rebow, Marek; Mochida, Tohru</i>	351
Comparison of Numerical and Experimental Results for the Spiral PCM TES Unit <i>Domanski*, Roman; Banaszek, Jerzy; Rebow, Marek</i>	357
Thermal simulation of PCM structures with TRNSYS <i>Jokisalo, Juha; Lamberg*, Piia; Sirén, Kai</i>	363
An evaluation of an air distribution system with storage tank using phase change materials - Effects of thermal properties on thermal environment of a room <i>Yamaha, Motoi</i>	369
Latent heat storage using a PCM-graphite composite material <i>Mehling*, H.; Hiebler, S.; Ziegler, F.</i>	375
Domestic heating and cooling with thermal storage <i>Vakilaltojjar, S. M.; Saman*, W.</i>	381

Thermochemical Storage

Studies on siliceous earth as an adsorbent material for thermal energy storage <i>Nahar*, N. M.; Sisodia, M. S. and Purohit, M. M.</i>	387
Thermochemical Energy Storage in Open Sorption Systems – Temperature Lift, Coefficient of Performance and Energy Density <i>Hauer, A.</i>	391
A Chemical Heat Pump for Performance Enhancement of a Cogeneration System <i>Kato*, Yukitaka; Watanabe, Akihiko and Yoshizawa, Yoshio</i>	397

Capturing The Sun For Solar Power Round-The-Clock	403
<i>Luzzi, Andreas; Lovegrove, Keith; Kreetz, Holger and Kasper*, Peter</i>	
Heat Releasing Characteristics of CaO/CaCO ₃ Reaction in a Packed Bed for High Temperature Heat Storage and Temperature Upgrading	409
<i>Kubota*, Mitsuhiro; Yokoyama, Kuniaki; Watanabe, Fujio and Hasatani, Masanobu</i>	
Solid sorption thermal energy storage for solar heating systems	415
<i>Mittelbach*, Walter; Núñez, Tomas; Luginsland, Frank and Henning, Hans-Martin</i>	
Cold Storage	
Research into an Innovative Tower-Style Tank System for Simultaneous Storing of Warm Water and Ice	421
<i>Kitamura*, Kunihiko; Shinya, Naofumi; Tagawa, Koutaro; Nakayama, Akio and Miyatake, Osamu</i>	
Research of the Ice Storage Tank's Features in Ice-storage Air-conditioning System	427
<i>Wu, Xiping</i>	
Thermal Performance of a Rock Bed Storage System	433
<i>Bansal, N. K.; Müller, C.; Vieira, M. E; Faber, C. and Schwarzer*, K.</i>	
Field experiments on consolidation of stored snow in the ground and a computational simulation for the underground snow storage	441
<i>Nagano*, Katsunori; Mochida, Tohru; Miyazaki, Teruo and Shimakura, Kazumi</i>	
Seasonally-Charged Deep Lake Water Cooling for Downtown Toronto	447
<i>Morofsky, Edward</i>	
Index of Authors	a

Volume 2: Posters

Co-operation	ii
Conference Organization	iii
Preface	iv
<i>Hahne, E.W.P. and Benner, Martin</i>	
Table of contents	v
Measurement of Apparent Thermal Diffusivity of Aquifer for ATES	453
<i>Umemiya*, Hiromichi; Haga, Eiji and Shirai, Daisuke</i>	
Guidelines for the Construction of Vertical Boreholes for Closed Loop Heat Pump Systems	459
<i>McCray, Kevin B.</i>	
Study on thermal energy storage system utilizing finite aquifer	467
<i>Nakamura*, Makoto; Shimizu, Takaaki; Kuroki, Tomohiro and Hokoi, Shuichi</i>	

The Central Solar Heating Plant with Aquifer Thermal Energy Store in Rostock, Germany <i>Schmidt*, Thomas; Kabus, F. and Müller-Steinhagen, H.</i>	473
A Study on Heat Supply System Using Underground Water Tank for Thermal Energy Storage <i>Nanaoka, H.; Hokoi S.; Nagai H. and Matsumoto M.</i>	479
Technical Assessment of Different Seasonal Underground Thermal Energy Storage Systems <i>Reuss, Manfred and Mueller*, Jens-Peter</i>	485
A New Concept of a Hybrid Storage System for Seasonal Thermal Energy Storage in Solar District Heating <i>Reuss*, Manfred and Mueller, Jens-Peter</i>	491
Investigation of Heat and Moisture Transport in a High Temperature Duct Storage <i>Reuss*, Manfred and Mueller, Jens-Peter</i>	497
Down-Hole Water Driven Hammer Drilling for BTES Applications <i>Tuomas*, Göran and Nordell, Bo</i>	503
Direct Cooling of Telephone Switching Exchanges Using Borehole Heat Exchangers in Different Climates <i>Paksoy*, Halime; Hellström, Göran; Enlund, Svante</i>	509
Cold Extraction from Winter Air in Different Climates for Seasonal Storage <i>Dikici*, D.; Nordell, B. and Paksoy, H. O.</i>	515
Thermal response of building envelope for passive cooling <i>Mathur, Rajesh; Rai*, Arvind and Mathur, B.L.</i>	521
A Chilled-Water Thermal Energy Storage Hvac System With High Temperature Differentials <i>Yu*, Hang; Watanabe, Toshiyuki; Akashi, Yasunori; Nishiyama, Norimitsu and Cui, Jun</i>	527
Indoor thermal environment and effect for energy-saving by using Ice- TES AHU with intermittent air flow <i>Shirota, Shuji and Ibamoto, Tadahiko</i>	533
Study on Air Conditioning System utilizing Floor Slab as Thermal Storage - A Simulation Model and Comparison with Measurements <i>Urabe, Wataru; Hokoi, Shuichi; Shinmura, Kouichi ; Kotera, Norihiko and Kasuya, Atsushi</i>	539
Study into Optimized Control for Air-Conditioning System with Floor Thermal Storage <i>Jung*, J.; Hokoi, S. and Urabe, W.</i>	545
Feasibility of a regional-scale heat supply and air-conditioning system using a ground source heat pump around Nishi-Shinjuku in Tokyo and its effect on reducing heat emissions in summer <i>Genchi*, Yutaka; Kikegawa, Yukihiro; Kondo, Hiroaki and Komiyama, Hiroshi</i>	551
Operating Results of Ground Source Heat Pump in Low Energy House <i>Hamada*, Yasuhiro; Ochifuji, Kiyoshi; Nagano, Katsunori; Nakamura, Makoto and Yokoyama, Shintaro</i>	557
Underground floor heat storage option for building space conditioning <i>Kaushik*, S. C ; Bhardwaj, V. and Ramesh, S.</i>	563

Heat Storage and Heat Exchange from an Insulated Salt Gradient Solar Pond	569
<i>Karakilcik*, Mehmet; Kiymac, Kerim</i>	
Effect of Connecting Hole through Tank Partition on Storage Performance for Parallel Type of Temperature-stratified Chilled Water Thermal Storage Tank	573
<i>Iwata*, Takeshi; Iwata, Yosimi; Kitano, Hiroaki; Sagara, Kazunobu</i>	
Use of alternate insulating materials for storage of solar water heaters	579
<i>Chaurasia, P.B.L.</i>	
Feasibility Study on Parallel Type of Temperature-Stratified Thermal Storage Tank	583
<i>Iwata*, Yoshimi; Sugiyama, Takeshi; Kitano, Hiroaki; Sagara, Kazunobu</i>	
Simulation of a Thermal Solar System Performance	589
<i>Morejon, Camilo F. M.; Abugderah*, Mabruk M.</i>	
Investigation of heat losses in SDHW-systems	595
<i>Helgesson*, Anna; Karlsson, Björn; Krohn, Peter; Larsson, Stefan; Perers, Bengt</i>	
Phase Change Material in solar water storage system	601
<i>Chaurasia, P.B.L.</i>	
The feasibility of combining phase change materials with building concrete products	605
<i>Lamberg*, Piia; Jokisalo, Juha; Sirén, Kai</i>	
Experimental Study on Latent Heat Thermal Energy Storage System Combined with Night Ventilation	609
<i>Kang*, Yanbing; Jiang, Yi; Zhang, Yiping</i>	
Thermal Performance Studies of a Latent Heat Storage Unit for Night Cooking	615
<i>Buddhi*, D.; Sharma, S. D.</i>	
Fin-tube Type Electric Water Heater Using Erythritol Evaluation of Fin Effect	619
<i>Yabe*, M.; Kakiuchi, H.; Yamazaki, M.; Chihara, S.</i>	
Solar Energy Storage In Organic Materials	625
<i>Mazman*, M.; Paksoy, H. O.; Evliya, H.</i>	
Latent Heat Thermal Energy Storage in Transparently Insulated Walls	631
<i>Weinländer*, H.; Beck, A.; Fricke, J.</i>	
Computation of thermal properties for PCM using molecular dynamics method	637
<i>Tsuchiya*, Yooko; Hasegawa, Hiromi; Iwatsubo, Tetsushiro</i>	
Thermochemical Energy Storage for Heating and Cooling – First Results of a Demonstration Project	641
<i>Hauer*, A. and Schölkopf, W.</i>	
Thermal Applications of Thermochemical Storage Systems with Zeolite	647
<i>Fischer*, S.; Kaupert, A. and Guzman, G. Zavala</i>	

Development of plate fin type reactor for heat recovery system using methanol decomposition	653
<i>Shiizaki*, Shinji; Nagashima, Ikuo; Iwata, Katsuo; Hosoda, Tetsushi and Kameyama, Hideo</i>	
Modelling of a sorption heat storage system based on calcium chloride for air dehumidification and heat recovery in indoor swimming pools	659
<i>Waldenmaier*, Thomas and Mühlbauer, Werner</i>	
Yearly method analysis for the cost-effective design of cool storage systems for HVAC plants	665
<i>Fernandes, João Francisco</i>	
Fundamental Study on Transportation system Using Ice & Water The Proposal for measuring IPF with Ultra sonic density meter	671
<i>Momota*, Masashi and Ibamoto, Tadahiko</i>	
Flocculation Prevention of Ice Slurry Using Some Surfactants	677
<i>Akiya*, Takaji; Endo, Akira; Owa, Masaru; Nakaiwa, Masaru; Nakane, Takashi; One, Kaoru; Tanaka, Hitoshi; Nakata, Toru; Tomiyama, Sumiko and Nobuchika, Kazuo</i>	
Solar chimney with thermal storage effects for stack ventilation	681
<i>Bansal, N.K.; Mathur*, Rajesh and Bhandari, M.S.</i>	
A Study on the Continuous Production Process of Ice Slurry Using Oscillatory Moving Cooled Wall	687
<i>Yamada*, Masahiko; Fukusako, Shoichiro and Kawabe, Hiromichi</i>	
Index of Authors	a
